

***Assignment - Introduce yourself and tell us why you chose this course.***

My name is Shubham Raj, and I'm 22 years old. I would describe my personality as approachable, light-hearted, and positive. I believe that, if asked, my classmates and mentor would say the same about me. I am also very curious to know new things and gathering knowledge. I completed my Diploma in Mining Engineering from Acharya Polytechnic in 2020. After competition of this course, I decided to enter in IT field and started gathering details of each course. And I started learning from Online and done some certification courses, I observed how data driven approach has changed the mining industry over last century. I think data is the new oil and, in the decades, to come it is going to be the key factor in technological evolution. I have been looking for opportunities in the data science field and failing to fulfill the criteria of most organizations i.e., bachelor's degree. I found Edyoda and this course will help me in excel in my career and provide me ample opportunities to learn Data Science in depth.
